Dear Hiring Manager,

I am writing to express my interest in opportunities where I can contribute my 15+ years of experience in software quality engineering, test automation architecture, and QA leadership to deliver exceptional results. Throughout my career, I have led testing strategies for mission-critical applications across financial services, logistics, and enterprise platforms, ensuring high-quality releases, faster delivery cycles, and improved business outcomes.

In my most recent role as **Senior/Lead Automation Engineer**, I designed and implemented scalable automation frameworks using **SpecFlow/Cucumber, Selenium, Playwright, Appium, RestSharp/RestAssured**, and other leading tools, achieving over **80% automation coverage** and streamlining release processes across multiple delivery streams. I have also successfully led QA transformations, mentored teams, and integrated automation into CI/CD pipelines to accelerate deployments without compromising quality.

I bring a well-rounded skill set that includes:

- Proven ability to lead cross-functional QA teams in Agile environments.
- Expertise in both UI and API automation, performance testing, and backend validation.
- Experience implementing risk-based testing strategies to focus on high-value areas.
- Strong mentoring, stakeholder collaboration, and problem-solving skills.

What drives me is delivering measurable impact—whether it's reducing production defects, improving ROI on automation, or enabling faster time-to-market. I take pride in aligning testing strategies with business goals and ensuring QA acts as a value driver rather than a bottleneck.

I would welcome the opportunity to bring my experience, technical expertise, and leadership skills to your organization and contribute to its continued success.

Thank you for your time and consideration. I look forward to the possibility of discussing how I can add value to your team.

Kind regards,

Hemendra Vishnoi
